

# METRONOR'S NEW PRODUCT GENERATION

Metronor is pleased to present its new generation of portable 3D coordinate measurement solutions.

From a new design to using the latest technologies – many changes have been made to improve the experience of using Metronor measurement equipment.

Keeping the same core technology concept, our systems are more flexible and adaptable than ever before.

Upgrade within product lines as the needs of your business grow with time.

More software options have been made available and using Metronor solutions with third-party software is now even easier.
